FintrAIn – AI-Driven Fintech Intelligence

Empowering banks, insurers, and GenZ through AI-based risk, KYC, and voice payments.

Our AI ecosystem focuses on:

- Enhancing credit decisions
- Strengthening fraud detection
- Powering inclusive, intelligent, and accessible financial experiences

India's $420 Billion Fintext Boom: Unlocking the Next-Gen Financial Fronteir

India's FIntech Market:

$110B (2024) →
$420B (2029) ↗

31% CAGR - World's Fastest Growing Fintch Ecosystem

- **87%** Fintect Adoption Rate
- **20 Billion UPI** Transactions/Month
- **1 Billion+** Internet Subscriber

Global Leadership & Digital Foundation

Policy Accelerators

- Account Aggarator: 10M+ Users
- RBI Digital Lending & ONDC

Targeted Segments: Multi-Billion Dolar Opportunities

Digital Lending & AI
India's Digital Lending Market (22% CAGR)

Digital Lending & AI
AI-powered risk profiling is key.

₹80 Lakh Cr (-$530B)
MSME New models for informal sector

$2.2 Billion by 2033
Multilingual, AI-driven onaboarding

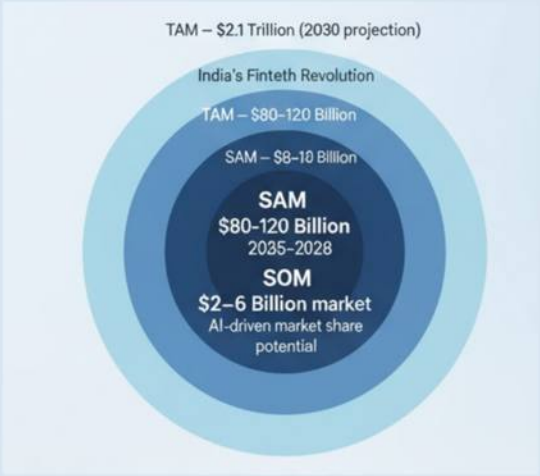

RegTech & KYC
India's RegTech/KYC Market (17.4% CAGR)

Fraud & Risk AI
85-95% AI detection accuracy

Our ecosystem is positined at the intersection of this growth, leverarging AI to unlock credit, prevent froud, and streemine onabaring for the next 760M users

Sources: KPMG (Oct 2025), RBI, NPCI, TransUnion CIBIL, TRAI.

A $2.1 Trillion Fintech Opportunity — but $55B in Annual Losses from Credit, Fraud & Onboarding Gaps

Credit Gap

₹80 Lakh Cr

MSME + GenZ gap Active digital and MSME adoption zones

Fraud Impact

₹36,000 Cr annual fraud

BNPL Defaults

5–7% loan default, $1–2B loss

KYC Cost

₹10K–50K Cr inefficiency, 68% drop-offs

Combined economic drag: ₹4.5–5 Lakh Crore annually.

Credit-Invisible GenZ

273M youth, no credit history, heavy UPI use

MSME Retailer

Small merchants <₹10L/month, low formal scores

Rural Entrepreneur

Tier 3+ users, local language docs

Digital Lender

Banks/NBFCs seeking scalable AI-KYC tools

Our ecosystem targets pain points across all key user archetypes in India's next-gen financial landscape

Market Validation: Proving the Growth Logic

The Core Equations

1. CAGR Back-Calculation

2024: $110B ⟶ 2024: $420B

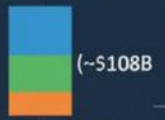

Formula: CAGR = (End Value / ⁷ᴬ1/Years) -1

Result: ≈31%

✓ Matches Reported CAGR

2. TAM-SAM-SOM Cohierence (Ratio Test)

SAM: ≈$5.4B

(~$108B

SAM Raio = SAM / TAM
SOM Raio
SOM Raio = (31% / SA

TAM: $2.1T (2030)

✓ Consistent & Realistıe of Thasig

3. Market Sensttivity Test

"Even Conservative Case = 3x Market Grosket Growth

→ Comula: Derived Market Size = Population Base × Monetiozation % $317B+ (Aligns with SOM Range)

4. User-Base Reality Check (Bottom-Up Valdation

- Credit-Invisible GenZ: 273M → $0.8B
- MSMES: 75.8M
- Digital Lenders (B2B)
- Digital Lenders (B2B) 50000+ = $0.5B
  Frigital Lesſes $9B

✓ Validates Resilence of Thesis

5. Behavioral & Policy Correlation Test

- UPI Volume → Fintetkk Valuations (r=0.82
- Smartphone Growth → Fintetkk Penetrtation (r=0.77)
- Policy Reform (AA, ONDC, DL) → 3x Compliant Lender Growth

✓ Conedivem1 Pata-Driven & Policy-Supported

✓ Growth is Data-Driven & Policy-Supported

6. AI Adoption Payoff Test

Formula: 5,810 AI Integration = Total Fintegated Firms
Avg. +22% Efficiency Ulilift

$92.4B

✓ 2025: 5,810 AI-integrated Firms

✓ Confirms AI's Financial Meaning

Each assumption validated through back-calculation and empirical correlation with

AI Integrated Ecosystem

Credit AI

Credit AI utilizes alternative data scoring to assess creditworthiness, enabling precise lending decisions that **reduce defaults** by 22–30%, benefiting both lenders and borrowers in the process.

Fraud AI

Fraud & Claims AI (InsurGuard) enhances security by detecting fraudulent activities in real-time, leading to significant savings for insurers, **up to ₹20K Cr** annually, fostering consumer trust.

BNPL

BNPL for Small Retailers (SmartPay) empowers small businesses by offering flexible payment options that **add ₹45K Cr** in financing, enhancing sales and accessibility for diverse customer bases.

Key Metrics

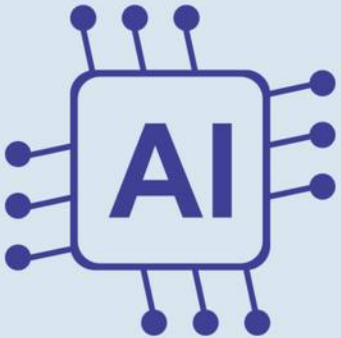

Key Impact Metrics showcase the system's efficiency: loan approvals increased by **2.5x**, KYC time reduced by **80%**, MSME coverage raised by **₹45K Cr**, and voice payment adoption surged **3x**.

Voice UPI

Voice UPI (FinBotPay) transforms transaction experiences by allowing users to make payments through voice commands, making services **accessible to over 150M+ users** in a seamless manner.

Closing Quote

"Together, these four pillars don't just digitize finance — they humanize it."

Credit AI

Data Source

- Account Aggregator / bank statements (consented)
- UPI transaction history (frequency, merchant mix)
- Utility & bill payments (regularity)
- GST / invoicing (for MSMEs)
- Device & telephony metadata (SIM age, device id)
- App behavior & social proof (optional, consented)
- CKYC / PAN / Aadhaar verification (identity anchor)

Features

- Cash-flow stability score (monthly inflow variance)
- Transaction velocity & merchant concentration
- Savings ratio / recurring bill payment ratio
- Repayment proxies (UPI refunds, reverse-cashflow patterns)
- Employment & income signal (payroll/recurring credits)
- Device trust & geolocation stability

Models

- Graph Neural Network for entity linkage (user ↔ merchant ↔ accounts)
- Gradient-boosted trees + calibrated logistic layer (fast scoring)
- Time series models for cash-flow forecasting (LSTM/Prophet)
- Explainable AI layer (SHAP / counterfactual summaries)
- Human-in-loop for borderline cases

Scores and Action

- Score range: 0–1000 → bands: Red (0–349), Amber (350–699), Green (700–1000)
- Decision rules:

1. Instant Approve (Green & low exposure) → auto underwriting, small ticket
2. Conditional Approve (Amber) → reduced limit / require guarantor / faster manual review

- Manual Review / Decline (Red) → require docs, call verification
- Risk controls: dynamic limit by tenure, watchlist & decay function for stale data

Growth & Business Model Roadmap — How We Scale and Montizize

Our Go-To-Market Thesis

B2B2B Saas: Pilot integrations with NBFCs/banks, montizze via API subscriptions + per-check fees, through channel partnerships, embed consumer voice UPI as an add-on.

3-Phase Expansion Roadmap

Phase A: Validate (0-9 months)

Objectives: 2 PoC, 10 paid pilots.
KPIs: PoC conv. rate ≥30% ≥30%, MRR ₹2.5-5L, CAC ₹'25k

Deliverabls: Case Studies + Initial ARR

Phase B: Productize & Scale (9-24 months)

Objectives: Launch pacagist :ubsciption tiers, sign 10 enterprise customers
KPIs: ARR ₹2-5 Cr, Net Retertion ≥110% Chum <6%.
Deliverable: 2 Channel Partners + Marktpace Listing

Phase C: Network Effects & Internationalize

Objectivoal expansion (SEA/ ttime Setup, Revenue Share
KPIs: ARR ₹20-50 Cr, GM >75%, LTV/CAC >4x
Deliver Muti-country Clients + Scaled Platform

Growth & Business Model Roadmap — How We Scale and Montizize

Our Go-To-Market Thesis

B2B2B Saas: Pilot integrations with NBFCs/banks, montizze via API subscriptions + per-check fees, through channel partnerships, embed consumer voice UPI as an add-on.

Sales & Distribution Model

- Direct Sales (Enterprise)
- Partnerships / Channel
- Markeiplace / Developer Growth
- Inbuint/Content/Events

Pricing & Moneization Mix

Key Unit Economics Formulas

Revenue per Customer (anrual) = (Monthly sub x 12) + (Avg API x priie. (Ict x 1 Avg API x price x 12) + one-time

LTV = ARPU Margin = Ree 1 / churn_rate x gross_gragin

CAC Payback (months) = CAC / (Monthly Monthly gross magrin pe poin per new customer

Key 6 Risks & Mitigations

The Future We're Building

AI that empowers trust – building India's next trilion-dollar inclusive finance ecosytem.

Inclusivity

Brining unserved users into formal credit through altemalive data

Transparency

Explainable, ethical AI for every ciodit or fraud decision

Scalability

Voice-first, multingural, plug-play platform lo india's next fintech wave

Our roadmap extends to 14 langiages, 10M+ users, and 10M+ verifed SMES by 2020

Thank You

Together, lèts redfine trust in digital finance
