Macro Events Driving Capital Rotation:

These events shaped sector-level liquidity during the competition window

14:30 124 MB/S

Event Driven Sector Rotation Strategy

Home Market Trades Trackers Social

Day 1

Trigger

Union Budget
+
EU trade expansion signals

Market Effect

1. Export
2. infra
3. capital goods inflows

Action

Used *Stoxo* as a screening layer to shortlist high-liquidity stocks aligned with macro trigger

Action

Entered foreign-exposed large caps early in the session

Day 1 **Day 2** Day 3 Day 4

Trigger

US tariff reduction from 50% → 18%

Market Effect

Improved trade volume expectations and foreign sentiment

Action

Used *Stoxo* to analyze tariff sensitivity and foreign revenue exposure

Action

Focused only on stocks where macro signal and macro signal and screening bias aligned

Day 1 Day 2 **Day 3** Day 4

Market Condition

No major macro triggers, increased intraday volatility

Strategy Shift

Event-driven → Volatility-based trading

Research Role

Stoxo used minimally decisions driven primarily by price action and volatility

Execution

- Bracket-based trades
- Short holding duration
- High-frequency profit booking

Objective: extract volatility premium in absence of directional edge

Timeline

Day 1 Day 2 Day 3

Day 4

Trigger

US gaming sector selloff

Market Psychology

Global tech sentiment spillover into Indian equities

Action

Used Stoxo sentiment analysis to confirm global sector weakness

Action

Executed short positions only after domestic price confirmation in Indian price action

14:30 124 MB/S

Trading Style by Market Regime

Day 1,2,4

Opening-session macro reaction trades

Day 3

Intraday volatility exploitation

Strategy dynamically adapted to information density in the market.

Risk Management Framework

- Sector rotation to avoid concentration
- Hedging via IT and correlated shorts
- Time-based exposure reduction
- Partial profit booking
- Forced liquidation compliance (system square-off)
